Care & Installation Maintenance

Roads can be dirty, but our custom plates are easy to clean so make sure to clean your plate on a regular basis to keep it looking beautiful. License plates are often overlooked while cleaning. And though it might not require much of your attention, there are specific ways to clean it. Using warm soapy water to wash it. This is the perfect way to give your license plate the glamour it starts missing after a trip on the road.

Installation

The installation of your customized license plate is relatively simple. Using a screwdriver to attach the license plate into the license-plate mount will do the job for you.

Note: This plate does not replace your required state issued vehicle registration plate and may only be displaced as a vanity.

Made in USA. UV resistant. Four (4) standard mounting holes, 1 7/8" in from the side and 1/2" in from the top / bottom.
